Marking highlight 1
Place the cursor under the first character of the text concerned and press
HIGHLIGHT 1. The text will move to the right and underbar will appear.

Move the cursor to the space after the last character of the text
concerned and press HIGHLIGHT 1 again. A second underbar will appear and
if there is any text to the right it will move to make room for the
underbar.

When printed the text between the underbars will be in the highlight 1
mode, i.e. unless the effect has been changed with the HT, it will be
underlined.

Marking highlight 2
Follow the same procedure as for highlight 1. Instead of an underbar the
marker in the text is an asterisk. In the default mode this will result
in bold type.
